In five' deep water, make a small pile of five to ten familiar objects that do not float (spools, coins, metal nuts and washers, bolts, soda can full of water, etc.). Players swim out, surface dive to inspect the articles, and return. They then tell the leaders all the articles they remember seeing. The game ends with the swimmers retrieving all the objects.

TOWEL RESCUE

Play this game in chest-deep water. Divide the group into two teams. Put one member of each team some distance from his teammates and give him a towel. On signal, he walks or swims to his team, tosses the end of the towel to a teammate, and tows him back to the position from where he started. The "rescued" boy then becomes rescuer and repeats the actions, "saving" another team member. Continue until the whole team has saved and been saved.

LIFELINE THROWING TEST

Make a target, as shown, and let the boys practice heaving a rope to a person in the water. Use a 25- to 30-foot rope and have the boys stand about 20 feet from the target. Weight the throwing end of the rope with a beanbag. The score for each heave is indicated by the numbers between the dowels. Dowels are 6" tall, placed 6" apart and painted as shown.
