

Get to Know You – Nuts and Bolts

Required: various sets of matching nuts and bolts in two bags

Preparation: Separate each set of nut and bolt. Put all the nuts in one bag and all the bolts in another. Make sure there is a nut for every bolt.

Notes: This activity is a good icebreaker for a new group. Learn about other scouts.

Each Scout picks out either a nut or bolt. When everyone has one, each scout finds his partner with the matching nut or bolt. Once pairs are found, they should learn names and three things about that person. They can introduce that person to the group and tell them what they learned about the scout.
