

Teeterboard Jousting

- Cub Scout How To Book

Make two teeterboards as in the picture above [24 inches in diameter with 4 inch high rockers] from $\frac{1}{2}$ inch plywood. Fasten the platform [24 inches in diameter] onto the rockers with wood screws and blocks. Make the jousting poles from plumber's suction cups, soft rubber balls, and squares of cloth, or stuffed socks. Place the boards so that the players are just within reach of each other.

Make sure adult supervision is always present when boys are playing games!!!!

Only pushing is permitted! Do not permit hard thrusting or swinging of the poles.

Boys should wear helmets to protect heads just in case of an accidental fall or hit although no hitting the head, face, or neck should be permitted.
